Rock Rapids, Iowa**

OUR INVITATION

THE 1960 IOWA ROYAL

We most cordially invite everyone interested in good livestock to attend the IOWA ROYAL of 1960.

The IOWA ROYAL SALE, recognized as the very top State Shorthorn sale in the Nation, is sponsored by the IOWA SHORTHORN BREEDERS' ASSOCIATION which also has always been recognized as one of the most progressive state associations in the NATION.

This year we are proud to say that we will have another FIRST at the IOWA ROYAL. This is being joined by the IOWA SHORTHORN and POLLED SHORTHORN BULL TEST ASSOCIATION in this great sale. This Association was sponsored and organized through the efforts of the Iowa Shorthorn Association with the Iowa Polled Shorthorn Club co-operating. The Iowa Bull Test Station is the first of its kind in the Nation and the first to sell a large group of bulls tested for feed efficiency, rate of gain and conformation. This combined sale at the IOWA ROYAL makes it one of the largest bull sales ever held in Iowa.

The 41 herd bull prospects and the 15 outstanding females in the Iowa Royal Sale are up to and probably better than the usual high standard of Iowa Royal Sales. They are the kind that warrant the usual high average that repeat satisfied buyers have been waiting to pay for them. There are many top show winners included and the bloodlines and ancestry are of the very best.

Confirm this by studying the catalog, note the consignors, the pedigrees, the footnotes and the outstanding records.

The 63 Performance Tested Bulls will make an outstanding added attraction since they are also of high caliber, plus the fact that they have an official index and performance tested record.

Breeders, ranchers and farmers from coast to coast and from the Canadian border to the Gulf of Mexico in great numbers have come to the IOWA ROYAL for seed stock in the past. THEREFORE, this year, make it a point to join them and see one of the truly GREAT SHORTHORN EVENTS. Definitely the IOWA ROYAL and BULL TEST sale will offer more than has been offered at any other sale.

PLAN TO ATTEND. We would like to show you our hospitality and give you every possible service we can.

IOWA SHORTHORN BREEDERS' ASSOCIATION

KADEL URICE,
President

ALBERT J. HAMANN,
Secretary-Manager

Schedule of Events

MONDAY, FEBRUARY 29—

2:00 p.m.—Iowa State Fairgrounds Pavilion—THE IOWA ROYAL SHORTHORN SHOW.

6:30 p.m.—Hotel Kirkwood—Pioneer Rooms—Buffet Dinner, Informal Program—Entertainment. Everyone invited.

8:30 p.m.—Hotel Kirkwood—Iowa Shorthorn Breeders' Annual Business Meeting, Election of Officers and Directors. All members are urged to attend.

8:30 p.m.—Hotel Kirkwood—Iowa Shorthorn Lassies' Annual Business Meeting, Election of Officers and Directors. All ladies from Shorthorn and Polled Shorthorn branches are urged to attend.

Buffet dinner tickets may be purchased from any of the Officers and Directors of the Association, or at the door of the Pioneer Rooms on Monday evening.

TUESDAY, MARCH 1—

10:30 a.m.—Iowa State Fairgrounds—IOWA ROYAL SHORTHORN SALE.

2:00 p.m.—PERFORMANCE TESTED SHORTHORN BULL SALE.

GENERAL INFORMATION

LOCATION—The sale will be held in the heated sale pavilion at the Iowa State Fair Grounds, Des Moines, on Tuesday, March 1, 1960. The sale will start promptly at 10:30 a.m. Des Moines is easy to reach by paved highway, railroad, bus service and plane service.

TERMS—The terms of this sale are cash unless other arrangements are made in advance with the consignor from whom you purchase. Settlements are to be made with the Clerk of the sale immediately at the conclusion of the auction. All stock will be at buyer's risk as soon as bid off and will be loaded in compliance with instructions from the purchaser.

GUARANTEE—All cattle sold in this sale will be sold under the Standard Guarantee endorsed by the American Shorthorn Breeders' Association and shown at the back of this book.

The above guarantee and terms shall constitute a contract between consignor and buyer of each lot. Neither the sale manager, officers and directors of Iowa State Shorthorn Association, Iowa Shorthorn and Polled Shorthorn Bull Test Assn., nor the clerk of the sale assumes any liability, legal or otherwise.

All cattle are absolutely healthy in every respect and will have passed the tuberculosis and Bang's disease test within thirty days of the sale. Health certificates will be furnished where required to ship into any state or territory.

Although we will use every precaution to provide for the comfort and safety of our guests, all persons who attend this sale do so at their own risk and the owners assume no liability, legal or otherwise, for any accidents that may occur.

Certificates of registry with transfers entered and recorded in the buyer's name will be furnished with each lot sold and for every calf at foot. An application will be furnished for every calf carried in dam.

Where footnotes appear in this catalog they were furnished by the consignor or written from information supplied by the consignor.

INSURANCE—Buyers wishing to insure their purchases through Harding & Harding Livestock Insurance can be accommodated by so indicating to the Sale Manager at the Sale or to the Sale Clerk at time of settlement.

MAIL BIDS—Mail or wire bids may be sent to Kenneth R. Fulk, Sec'y. American Shorthorn Breeders' Ass'n., Omaha, Neb.; Mervin F. Aegerter, Seward, Nebr.; Thomas W. Sherlock, Wallaces Farmer, Des Moines, Iowa; Albert J. Hamann, Rock Rapids, Iowa or to the auctioneer, J. E. Halsey, Des Moines, Iowa, Box 1317. Late bids to the above may be addressed in care of the Kirkwood Hotel, Des Moines, Iowa on Sale day.

TIMELY INFORMATION

SALE HEADQUARTERS—The Kirkwood Hotel, Des Moines, Iowa, will be the Sale Headquarters. Make personal hotel reservations as soon as possible and mention the Iowa Royal Shorthorn Sale. The telephone number is CHerry 49191.

TELEPHONE & MAIL—Any late mail and buying orders can be addressed in care of, or phoned to Albert J. Hamann, Sale Manager, Hotel Kirkwood, Des Moines, Iowa. Mark late mail, "Hold for Arrival." On sale day he may be reached by PHONING the CATTLE BARNS, IOWA STATE FAIR GROUNDS, DES MOINES, IOWA.

ANNUAL MEETING, BUFFET DINNER—Always a great Iowa Royal event, will be held at the Kirkwood Hotel, Monday evening, February 29th, 6:30 p.m. The program will be interesting, educational and entertaining. The food will be excellent. Meet Shorthorn enthusiasts from many states and great distances.

SHOW & SALE FACILITIES—The Show and Sale accommodations in the main cattle barn at the Iowa State Fair Grounds are ideal for this great event. The ample exhibition stalls and wide alleys are ideal for viewing and inspecting the sale cattle under comfortable conditions. The large heated sale pavilion is one of the finest with comfortable seats and an ideal view of the cattle selling. A fine large lunchroom and additional lunch stands will accommodate the large attendance throughout the sale. The Fair Grounds has unlimited parking facilities for cars and trucks.

SHIPPING & TRANSPORTATION FACILITIES—There are good facilities for loading and shipping livestock. Des Moines is on the main line of good railroads and there will be ample trucks available for either short or long distance hauling and either small or large loads.

1960 Iowa Royal Shorthorn Show

IOWA STATE FAIRGROUNDS, DES MOINES, IOWA

Show Starts at 2:00 p.m., Monday, Feb. 29

JUDGE—Dewey Carnahan, Elbert, Colorado.

Through the courtesy of the Des Moines Chamber of Commerce trophies will be awarded the Grand Champion Bull and the Grand Champion Female.

MERDALE BROAD DISPLAY—A well balanced, level-lined bull with a good head. By a great sire and from one of the good cow families of the breed. This bull has a great show herd record. In 1958 as a junior calf he was Reserve Champion at the Osceola County Fair and Reserve Junior Champion at the strong Clay County Fair show. In 1959 he was the Reserve Grand Champion at the Clay County Fair. We have used him and his first calf is outstanding. A real bull you can buy with confidence.

DIVIDEND'S MONITOR—A smooth, meaty bull with a burly masculine head and neck. His sire, Sandoon Dividend, is a straight Marshall bred bull out of a dam by Cruggleton Perfect and with two crosses of Cruggleton Willingdon. His dam is an excellent daughter of the \$10,000 Camson Better News by Calrossie Good News and her dam is by a son of Cruggleton Prince Bob by Cruggleton Perfect. He has the conformation and the ancestry to guarantee his performance as a breed improving sire.

UPRIGHT RESERVE—This is a good horned bull although of the best Polled breeding. He stood well up in class at the 1958 Iowa State Fair and his dam was third in a strong class at the 1956 State Fair. His sire is one of the very top sons of the all time record price, the \$65,000 Perth Champion, Pittodrie Upright. This strong two-year-old has the good head, heavy bone and conformation of a herd sire.

K A CRUSADER—This bull is bred identically to K A Cimmaron our Bull Test Station entry. Crusader displays the strength, ruggedness and substance so typical of sons of Scotsdale Kinross. We are receiving reports from breeders who have calves by the Kinross bulls and their comments are similar to this one from Gerald Radant of Madison, Nebraska: "If they develop in the pattern they have now, they will undoubtedly be the best we've ever had."

K A COMMODORE—We're rather proud of this entry as two of our best families are represented in his pedigree. His sire, K A Accent, was sold in the Iowa Royal two years ago to M. H. Walter, Roswell, So. Dak., for \$830. Commodore is extremely smooth, thick, sound and trim. He should sire wonderful steers. His dam has her second calf and we feel it's the best bull calf by our Rothney Justinian to date.

DUQUESNE CRUSADER—A bull with as much popular breeding as any bull in the sale will have. His grandsire on sire's side, Calrossie Hyperbole, sired two Perth Supreme champions that sold for \$18,000 and \$39,000. Then Beaufort Bulldozer, grandsire on the dam's side, sired an International champion bull and two International Champion females. The latest in 1959. Don't overlook this one.

M V ROYAL TALISMAN 32d—An outstanding calf that has a good head, burly neck and is exceptionally thick, smooth and deep bodied. He has a great rear quarter and stands on sturdy legs. His full brother who at the same age was the champion and top selling bull in the 1959 Tri-State Sale, is now a herd sire in the large Huso Bros. Polled herd. His sire, an Omaha Champion, sired Tri-State's 1958 and 1959 tops and 1960 reserve champion. His dam is sired by a former Tri-State champion and granddam by a Sioux Empire champion. This calf has reason to be a great sire.

DIRECT SUPERVISING COMMITTEE OF STATION FOR ASSOCIATION

Homer Clausen — Harold Rasmussen — R. W. Packer

DIRECT OFFICIAL SUPERVISORS OF STATION FOR IOWA STATE UNIVERSITY

- Dr. Robert de Baca, Animal Husbandry Dept., ISU, direct official supervisor of all feeding, weighing and handling of bulls and compiling all official test data and indexing.
- Dr. John B. Herrick, Extension Veterinarian, ISU, in charge of setting up and maintaining entire health and health inspection program of bulls in station.
- Dr. Kenneth Creston, Professor ISU Veterinary School, resident veterinarian for station administering all veterinary needs of bulls in station.

OTHER IOWA STATE UNIVERSITY PERSONNEL who played a large part in supplying technical information and leadership for organizing and establishing Bull Test Station, are:

Dean Emeritus H. H. Kildee, Iowa State University.
Dr. L. N. Hazel, in charge of Breeding Research, ISU.
Dr. Solon Ewing, Head, Beef Cattle Dept., ISU.
Dr. Ralph Durham, Livestock Extension Dept., ISU.
Professor Bill Zmolek, Beef Cattle Extension Dept., ISU.
Garold Parks, Beef Cattle Superintendent, ISU.

COMMITTEE who scored bulls at beginning and end of test:

L. E. Mathers, Shorthorn Judge and Breeder.
H. H. Kildee, Dean Emeritus, Iowa State University.
Kenneth R. Fulk, Executive Secretary, American Shorthorn Association.

STATION located at Ames, Iowa.

Melvin Bell, Resident Herdsman for Bulls and Station.

INFORMATION ABOUT THE PERFORMANCE TESTED SALE BULLS

On August 4, 1959, forty-four Iowa Shorthorn and Polled Shorthorn breeders placed 63 bulls on official performance test for comparing rate of gain, feed efficiency, conformation score and total index at the breed owned Iowa Shorthorn and Polled Shorthorn Bull Test Station near Ames, Iowa.

This station was organized, established and financed by the Shorthorn Breeders of Iowa.

Iowa State University personnel gave liberally of their time, technical knowledge and technical supervision in setting up one of the most modern tests of its kind yet developed.

Kenneth R. Fulk, Executive Secretary of the American Shorthorn Ass'n. supplied the initiative and spirit in this progressive, forward move for the Shorthorn breed.

The 63 bulls were brought to the Station 30 days prior to the start of the test and given a leveling out period on the same feed and with the same care so that all would start the official test on an equal basis. The mechanics of the test are explained on the following pages in "Interpreting the Results of the Tests." The test ended Jan. 19, 1960. All the information from the test is given as a footnote under the pedigree of each bull in this catalog. It is sincerely hoped that all will study these comparative results of the test carefully.

In addition to the performance test, these bulls were tested for many things of profound interest to all practical cattlemen.

A complete up-to-date health program was set up for all bulls upon entering the Test Station. Before being accepted at the Station, all bulls were TESTED FOR

TUBERCULOSIS, BRUCELLOSIS, LEPTOSPIROSIS, JOHNES DISEASE, and all other diseases. Periodically throughout the test they were given a physical examination. Needless to say, the health of bulls throughout has been far above average.

Prior to the sale all bulls will AGAIN HAVE BEEN TESTED FOR TUBERCULOSIS, BRUCELLOSIS and FERTILITY.

Truly, this group of bulls can be bought with the utmost of confidence by all progressive cattlemen whether purebred breeders or commercial producers.

All sound cattlemen from all parts of the country are urged to attend this Performance Tested Bull Sale in connection with the IOWA ROYAL SALE on March 1, where improving bulls can be bought in numbers.

HOMER CLAUSEN,
President

ALBERT J. HAMANN,
Sale Manager

INTERPRETING THE RESULTS OF THE TEST

The following three factors were considered in this test and were given **equal value** in figuring the index of each bull.

1. **DAILY GAIN ON TEST**—The bulls were fed for six 28 day periods or a total of 168 days on test, and the average rate of gain per day in pounds computed.
2. **FEED PER 100 POUNDS GAIN** or feed efficiency—Each bull was individually fed, a record of pounds of feed consumed recorded, and feed per 100 pounds gain figured.
3. **Conformation**—The bulls were scored for conformation at the beginning and end of the test by a committee. The final score was given twice the value as the beginning score in computing the conformation score.
 - 13 - 15 **Excellent**—Bulls suitable for a very top herd of brood cows, 15 score would be a near perfect bull, a score almost impossible to attain.
 - 10 - 12 **Very Good**—Bulls for most good registered herds, might also be used on some top registered herds and top commercial herds.
 - 7 - 9 **Good**—Bulls for most good commercial herds, might also be used on some registered herds.
 - 4 - 6 **Fair**—Bulls for some commercial herds.
 - 1 - 3 **Poor**—Undesirable bulls, lacking in soundness, etc.

INDEX—In order to give the three factors equal value and in order to have the average of the bulls tested have an index of 100, the following formula was used:

Average daily gain—lbs. of feed per 100 lbs. gain + conformation = Index
to give equal emphasis then, the following figures were used:

(Ave. daily gain x10.8)—3.2x feed per cwt.) + 2x ave. conf. score) = Index

The index then, gives the total score of each bull, considering daily gain, feed efficiency and conformation, in comparison with the other bulls in this test.

FOOT NOTES—The foot notes on each bull show the following:

Conformation score (high 13.6, low 4.6, average 8.5)

Daily gain on test (high 3.25, low 1.40, average 2.17)

Feed per 100 lbs. gain (high 1098, low 621, average 828)

Index (high 118, low 84, average 100)

Weight at end of test (high 1645, low 920, average 1275)

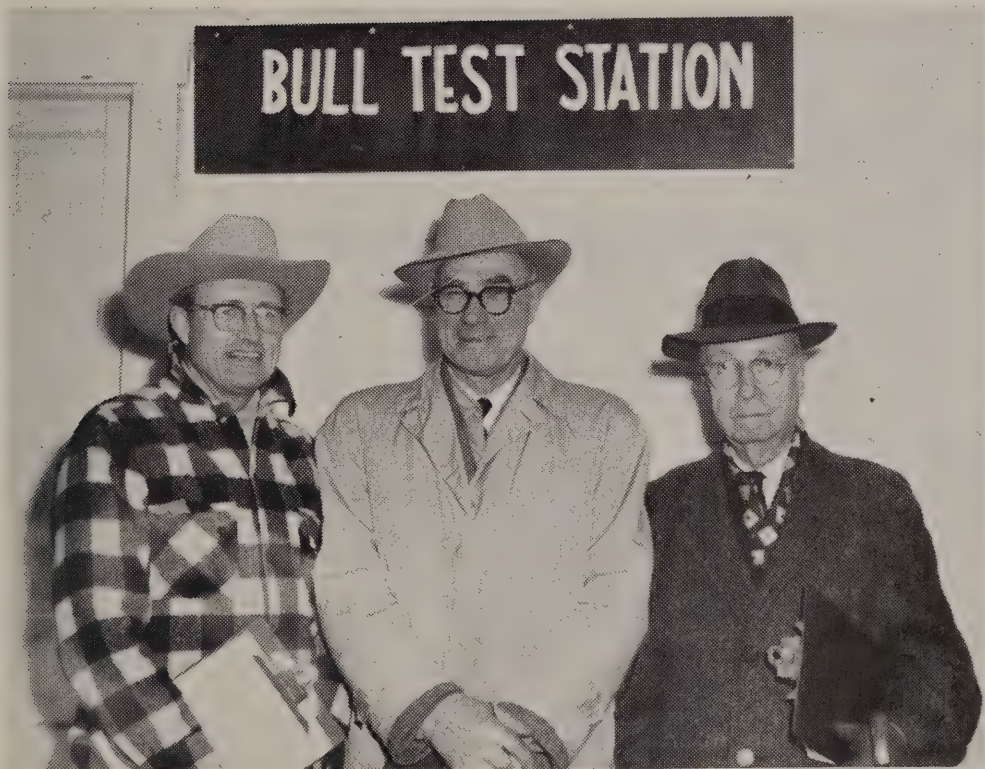

Weight per day of age (high 2.62, low 1.75, average 2.14)

SUMMARY—The purpose of the test was to find factual information, to help breeders evaluate bulls. Each individual breeder must decide what is important in his herd. The information collected, combined with your judgment, should take most of the guess-work out of beef cattle improvement. We feel, and have been advised by authorities from all parts of the United States, that this is the most modern test of its kind yet developed.

Because of the long duration of the test and the age of the bulls, one should not expect the phenomenal high gains that has been reported for some tests. This test should not be compared with other tests—each test is different—this test can be used only in comparing these particular bulls.

The hundreds of visitors at the Iowa Shorthorn and Polled Shorthorn Test Station have been impressed with the high quality, ruggedness and thrifty condition of the 63 bulls being tested. I too, have been impressed, and feel that this test station is forging the way for the future.

—KENNETH R. FULK.

Left to right—Kenneth R. Fulk, Exec. Sec'y., American Shorthorn Ass'n., Omaha, Nebr., L. E. Mathers, Leveledale Farm, Mason City, Ill., and Dean Emeritus H. H. Kildee, Iowa State University, Ames, Iowa, the committee that scored each bull in the Test Station at the start and end of the test.

STANDARD GUARANTEE

OF

AMERICAN SHORTHORN BREEDERS'

ASSOCIATION

1. Proper care must be given by purchaser to protect breeding qualities and health of guaranteed animals.

2. All bulls are guaranteed breeders, provided they are not allowed to serve when under 14 months of age, or allowed to run with the herd when under 20 months of age. In case of failure of a bull to be a breeder, notice shall be given to the seller within six months of date of purchase, or by the time the bull is 20 months of age, if purchased under 14 months of age.

3. With the exception of heifers sold under 14 months of age, all females are guaranteed breeders. Heifers under two years of age shall not be served by a heavy or old bull. Cows or heifers sold as bred, or safe in calf, not proving to be in calf must be reported to the seller within three months after date of sale. Females over 14 months of age sold open, not settling within six months after date of sale, shall be promptly reported to the seller.

4. When an animal fails to comply with the above guarantee the seller has the option of substituting an animal of equal value to the satisfaction of the purchaser, or of having the animal returned for a trial for a period not to exceed six months. The expense of freight in such case is to be paid by the seller. If the animal is then proved to be a breeder beyond doubt it shall be returned to the purchaser at his expense. In case of dispute the return of the full purchase price, without interest, to the buyer will be considered full settlement and satisfaction to all claims. No charge for feed or maintenance shall be made by either buyer or seller. Salvage shall go to the seller. It shall be understood that the same guarantee given for the first animal shall likewise apply to any animal later substituted.

5. All animals are sold to comply with the laws regulating Tuberculosis and Bang's disease of the state.

6. Certificates of registry and transfer will be furnished with each animal sold. A signed pedigree application for unborn calves should be furnished with bred females, showing names and record numbers of sire and dam as well as service date.

7. Shipment will be made as soon as possible after the close of the sale, but at purchaser's risk of loss or injury after animal is bid off. Where cattle are sold at private treaty the above terms should apply as well as for sale at auction.

All animals sold in this Sale will be backed by the above Standard Guarantee.

As a safeguard to prospective buyers, every animal has successfully passed a clean abortion blood test within 30 days prior to the sale, or will have Certificates of Bang's Calfhood Vaccination, and those that are not from Accredited herds have passed a clean Tuberculin test within the same period. Health certificates will be provided with each lot sold.

Iowa Shorthorns **PROGRESS with PERFORMANCE**

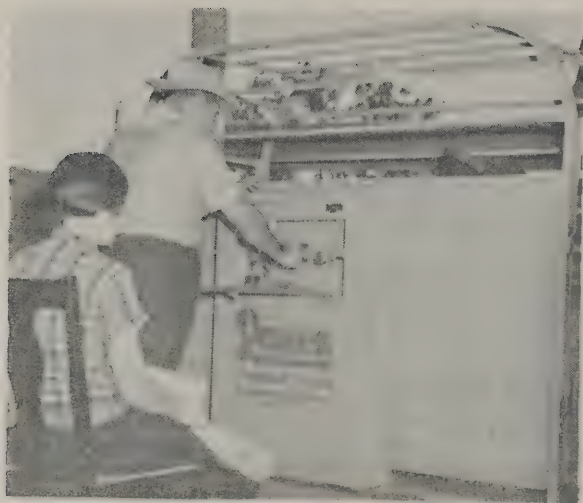

SHORTHORN BULLS ON PERFORMANCE TEST

By: Robert C. de Baca
Ext. Animal Husbandman
Iowa State University, Ames, Iowa

Sixty-three Shorthorn and Polled-Shorthorn bulls are currently being compared in a performance test at the newly established, breed-owned Iowa Shorthorn Bull Testing Station near Ames, Iowa. The bulls are on an official 168-day test following a 30-day conditioning period. Feed requirements per pound of gain, daily gain, and conformation--at the beginning and end of test--are being determined for each bull. The bulls will be indexed, giving equal weight to each of the three factors; i.e., daily gain, efficiency, and conformation. The index calculated for each animal is a figure which will describe the animal's relative breeding value, taking into account the heritability and economic worth of the traits considered. It helps to eliminate the need for guesstimating what an animal might be. All of the information from the test will be published in the catalog of sale after the conclusion of the trial.

The objectives of the test are to pinpoint those animals which are highly desirable in conformation by breed standards, superior in daily gains, efficient in the use of feeds, and to offer these animals for sale with the performance record available for inspection. Differences as high as 1.5 pounds in daily gain in the feedlot and up to 300 pounds feed per 100 pounds of gain are commonly demonstrated in beef cattle of

SHOW - FEBRUARY 29, 1960
SALE - MARCH 1, 1960, FAIRGROUNDS, DES MOINES, IOWA

the same conformation and subjected to the same conditions. It has been repeatedly shown that these differences are highly heritable and deserve increasing emphasis in selection programs along with conformation. During a 500-pound gain period a difference of 300 pounds in feed per 100 pounds of gain would amount to 1500 pounds of feed or currently about \$26.00 extra cost to the feeder. Slower gaining calves are generally less efficient, and tie up the feeder's labor, buildings and time for much longer than fast gainers in reaching market weight and condition. An over-all program for beef cattle improvement and selection should include emphasis on

(1) conformation and carcass desirability, (2) reproductive efficiency of the cows, (3) good mothering ability of the cows, (4) efficiency of feed use, and (5) rapid rate of daily gain. Such a program should be a part of sound management along with good feeding, sanitation and marketing procedures. With these features of livestock improvement in mind, the Shorthorn Bull Testing Station is at its first year of operation.

The bulls were scored for conformation at the beginning of the test (August 4) by Les Mathers, prominent Shorthorn judge and breeder, H.H. Kildee, Dean Emeritus of Iowa State University, and Kenneth Fulk, Executive Secretary of the American Shorthorn Association. The bulls will be scored again at the end of the test (February 17, 1960) by the same committee. Each scorer independently grades the bulls and the average of the three scores is the score which describes the bull. The sale-score and index-score will give double emphasis to off-test score compared to on-test score to take into account differences in upgrading due to fattening on test. The scoring is done, however, with an attempt to discount the effect of fatness. The conformation scoring system used by the committee is based on a point system with a range from 1 to 15. A score of 13 to 15 applies to an EXCELLENT bull, which should approach the ideal in type, conformation and breed character. A bull with a score of 15 should be tops in strong competition, whereas bulls with scores of 13 and 14 should make a good showing in strong competition. Most of the purebred sires should come from this classification, provided they stand high in rate and efficiency of gain and index way up on the three traits.

Scores of 10 to 12 would indicate a VERY GOOD bull, which would represent a practical top in commercial cattle and a decent middle and low end of purebred herd bulls. These animals stand high in conformation, soundness, and breed character, and are highly acceptable, along with good growth and efficiency records.

GOOD bulls range from scores of 7 to 9 representing conformation, type and breed characteristics of good commercial worth. These bulls have

thickness, strength, soundness, and balance required for a good job on commercial cows. Bulls with scores of 4 to 6 designated FAIR bulls might be deficient in certain points of conformation or breed characteristics, yet might be highly desirable in other traits. Generally speaking, this class of bulls would feature the middle and lower end of commercial bulls. They might have certain traits which are exceptionally desirable and for the man not interested in the specific points of breed character, there could be some very desirable bulls in this class. Scores of 1 to 3 include POOR bulls which are off either in soundness, or conformation, or breed character. This classification would include those animals which would be expected to contribute little to a cow herd, from the standpoint of conformation.

Much is to be gained from performance testing. In gearing toward selection methods which lessen operating costs in terms of time, labor, and feed required per unit of gain, one is striving for greater profits. The Shorthorn breeders must strive to keep abreast of any sound systems which are designed to contribute to profit, to increase the quality of beef, to maintain a sound demand for meat products, and to meet competition afforded by other breeds. Production testing is taking hold in many of the areas where Iowa bulls are sold. Those breeders are asking for production tested bulls and it is not enough that they be tested, but they should have tested in a bracket with the good ones. The expressed intent of the Iowa Shorthorn Bull Testing Station is to find out which the good ones are.

The first bull arrives at the Iowa Test Station. Homer Clausen, President of the Iowa Shorthorn and Polled Shorthorn Bull Test Association in the middle, Dr. Herrick, extension veterinarian, at the left, and Bill Zmolek, extension animal husbandman, checking the arrival weight, health papers, and preparing to give the bull a complete examination. "Bud" Rassmussen, member of the test committee and Loyd Beecher, secretary of the test association, behind Homer. This first weighing was for information only, the bulls were levelled out on feed several weeks before starting on test.

Charles Bell, Jr., Chief Animal Industries Branch Federal Extension Service USDA; Dr. "Bud" Ewing, Professor of Beef cattle, ISU; Garold Parks, Beef Cattle Superintendent, ISU; and others inspecting the bulls at mid summer.

IOWA SHORTHORN AND POLLED SHORTHORN BULL TEST ASSOCIATION By: Homer Clausen, President, Spencer, Iowa

In this day and age we are seeing farm and feedlot operations going thru quite a change. We hope they are for the good and are sorry for those that are being squeezed out. We have operations getting larger, more specialized and automatically more efficient. We are realizing we must operate on the same principle as big industry. We, in the purebred livestock business must first produce, then test or prove our production and then sell it.

Recent information on performance testing at various colleges is rapidly proving its importance to breeders of purebred beef cattle throughout the country. Here in Iowa, Shorthorn and Polled Shorthorn Breeders have been considering such a program for some time. In March of 1959 the breeders met from the State of Iowa and agreed that if they were to hold a strong position in the beef cattle industry, now was the time to start. So, the Iowa Shorthorn and Polled Shorthorn Bull Testing Station was organized. It is owned and financed by the Shorthorn and Polled Shorthorn Breeders of the State but supervised by Iowa State University.

In organizing many questions were brought up, such as: What are we testing for?; Will the breeder receive enough information to warrant the expense of such a test?; Will the purchaser be willing to pay a premium for good and high performance tested bulls?; then, how and when will tested bulls be sold at completion of test?

Lets look at it this way, most everything the farmer and feeder buys today is proven and tested before it is offered him. His machinery, seed, feed and in some cases his livestock and poultry.

BULL TEST STATION

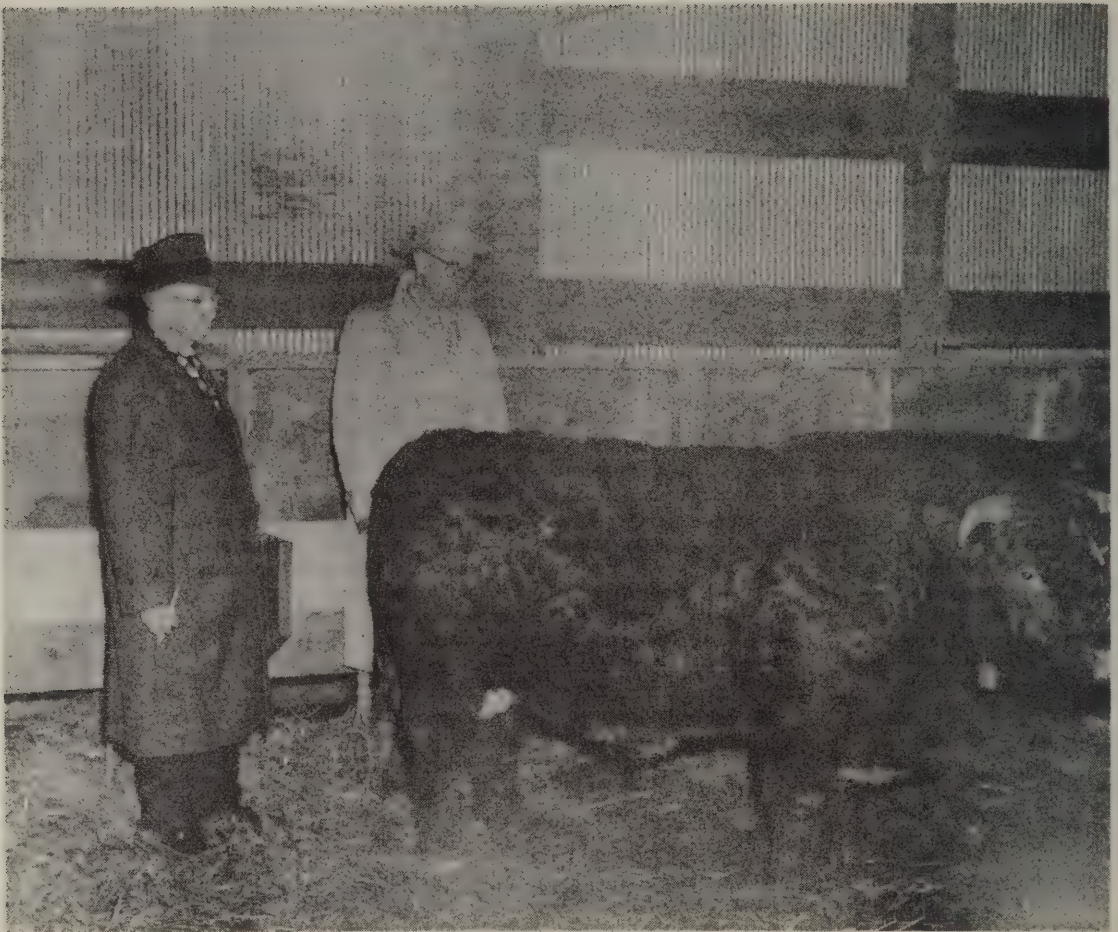

Conformation scoring committee - Ken Fulk, Omaha, Nebraska, Les Mathers, Mason City, Illinois, and Herb Kildee, Ames, Iowa.

Now, what are we performance testing for? Type and conformation rate and efficiency of gain is a starting point. Now, lets take these one at a time. We know good Shorthorns are of good type and conformation. Here at our test station we had three very competent judges grade the bulls at the beginning of the 180 day test. They graded them as: excellent, choice, good, and fair. At the completion of the test the same three men will grade them again.

The next step in our program is the rate of gain. At the beginning of our 180 day test the bulls were weighed in and have been weighed every 28 days since, so the final weight at the end of the test will give us an accurate official rate of gain, this all being done by the college.

At this time, our test is over half way completed and there is quite a variation in the daily rate of gain. Several very important points are brought out here: One, our yearling bulls are gaining right along with the calves and another is you just don't pick out the good gainers by sight, only by performance testing will we uncover the fast gaining cow families and good sires.

Efficiency is probably the most used word in any business today and that brings us into the next part of this program, feed conversion. Here at the test station our bulls are divided according to age in lots of 15 to 20. They run loose with exception of an hour night and morning, when they are tied and fed individually. This way a complete record of every pound of feed consumed is kept. Here at the middle of the test we are finding quite a variation as to feed conversion, as much as $4\frac{1}{2}$ to 1 against 11 to 1. The bulls have been fed a very simple, rather cool ration throughout the period, this is also under the supervision of the college staff.

Dean Emeritus H.H. Kildee and Les Mathers scoring a bull for conformation.

In the cattle feeder's operation this would be the most important part of this program.

It will take considerable time and research to come up with the actual value of a high performance testing sires. Only time and research will tell how much of a premium the feeder will pay for feeders sired by such a sire.

The herdsman at the station and the veterinary department at the college have kept a very close watch on the health of each individual bull throughout the test. At the completion of the test the bulls will have to meet all health requirements, including a semen test. This is most valuable information.

In summarizing the above, we have accomplished the following and I don't feel we have made too many mistakes.

We have tested one against another under the same environment, feed and management.

We will have uncovered some top bloodlines on the sires side as well as the cow families. We will have retained correct and useful type and conformation. We will have uncovered bulls of good efficiency and gain, and will make available to the beef cattle industry such seed stock.

It has been decided by the Directors of the Iowa Shorthorn and Polled Shorthorn Bull Test Association to sell the 63 tested bulls in Des Moines, Iowa, on March 1, 1960. This sale to be in connection with the Iowa Royal Show and Sale. All information acquired throughout the test will be published and available sale day.

INTERPRETING THE RESULTS OF THE TEST

The following three factors were considered in this test and were given equal value in figuring the index of each bull.

1. **DAILY GAIN ON TEST** - The bulls were fed for six 28 day periods or a total of 168 days on test, and the average rate of gain per day in pounds computed.
2. **FEED PER 100 POUNDS GAIN** or feed efficiency - Each bull was individually fed, a record of pounds of feed consumed recorded, and feed per 100 pounds gain figured.
3. **CONFORMATION** - The bulls were scored for conformation at the beginning and end of the test by a committee. The final score was given twice the value as the beginning score in computing the conformation score.
 - 13 - 15 Excellent - Bulls suitable for a very top herd of brood cows, 15 score would be a near perfect bull, a score almost impossible to attain.
 - 10 - 12 Very Good - Bulls for most good registered herds, might also be used on some top registered herds and top commercial herds.
 - 7 - 9 Good - Bulls for most good commercial herds, might also be used on some registered herds.
 - 4 - 6 Fair - Bulls for some commercial herds.
 - 1 - 3 Poor - Undesirable bulls, lacking in soundness, etc.

INDEX: - In order to give the three factors equal value and in order to have the average of the bulls tested have an index of 100, the following formula was used:

$$\frac{\text{Average - pounds of feed per}}{\text{daily gain}} + \frac{\text{conformation}}{100 \text{ pounds gain}} = \text{Index}$$

to give equal emphasis then, the following figures were used:

$$(\text{ave. daily gain} \times 10.8) - (3.2 \times \text{feed per cwt.}) + (2 \times \text{ave. conf. score}) = \text{Index}$$

The index then, gives the total score of each bull, considering daily gain, feed efficiency and conformation, in comparison with the other bulls in this test.

INFORMATION - The following information was obtained for each bull:
Conformation score, Daily gain on test, Feed per 100 lbs gain, Index, Weight at end of test, Weight per day of age.

DES MOINES, IOWA

The purpose of the test was to find factual information, to help breeders evaluate bulls. Each individual breeder must decide what is important in his herd. The information collected, combined with your judgment, should take most of the guesswork out of beef cattle improvement. We feel, and have been advised by authorities from all parts of the United States, that this is the most modern test of its kind yet developed.

Because of the long duration of the test and the age of the bulls, one should not expect the phenomenal high gains that has been reported for some tests. This test should not be compared with other tests - each test is different - this test can be used only in comparing these particular bulls.

The hundreds of visitors at the Iowa Shorthorn and Polled Shorthorn Test Station have been impressed with the high quality, ruggedness and thrifty condition of the 63 bulls being tested. I too, have been impressed, and feel that this test station is forging the way for the future.
